-deSha's will donate \$1 from every featured item sold to the International Rett Syndrome Foundation

Meet Cecilia, a 4-year old girl from Loveland, Ohio who lives with a rare genetic disorder known as Rett syndrome: a debilitating neurological disorder that leads to severe impairment affecting nearly every aspect of her life, including the ability to speak, walk, eat and even breathe. Despite these challenges, Cecilia is a very happy little girl who shows her love through her eyes, smiles, and giggles. Cecilia takes part in intensive therapy five days a week between Cincinnati Children's Hospital and her special education class at Loveland Early Childhood Center. There is no cure for Rett Syndrome yet, but there are promising therapies in process. The International Rett Syndrome Foundation is committed to funding breakthrough discoveries and life-changing advancements in research toward a cure while also supporting families affected by Rett Syndrome. They fight for individuals like Cecilia to create a world without Rett Syndrome.
